

ABDELRAHMAN MOHAMED NAGUIB

Flutter Developer

Minya, Egypt ◊ (+20) 1554240571 ◊ (+20) 1017473389 ◊ apdonagip715@gmail.com

CAREER OBJECTIVE

Result-oriented Flutter Developer with a solid foundation in Dart and mobile UI development. Currently mastering Firebase, Git/GitHub, and Payment Gateways. Fast learner with a passion for building scalable cross-platform apps and solving real-world problems through clean code.

EDUCATION

Faculty of Computers and Information
Bachelor of Computer Science

Graduated
Age: 23

TECHNICAL PROJECTS & EXPERIENCE

Chat Application (Full-stack)

Oct 2024 - Present

- Developing a real-time messaging app using **Flutter** and **Firebase**.
- Implementing User Authentication (Login/Register) and Firestore for real-time data storage.

Weather Forecast App

Aug 2024 - Sep 2024

- Built a dynamic weather app utilizing REST APIs to fetch global weather data.
- Managed app state using **Cubit (Bloc)** and customized dark/light themes.

News Portal App

Jun 2024 - Jul 2024

- Integrated third-party APIs to display real-time news articles.
- Implemented asynchronous programming (Future/Async) and JSON serialization.

Toku Learning App

Mar 2024 - May 2024

- Designed a multi-page educational app with local audio asset integration.
- Focused on navigation patterns and modular UI components.
