PROJECTS

Metchik 2023 – 2024

Clothes E-commerce with AI
Final Year Project: E-Commerce Mobile App with Virtual Try-On
Role: Backend Developer

Engineered and deployed the robust **Backend infrastructure** for a clothing application featuring product catalog display and an innovative **virtual try-on experience**. **Developed** scalable **RESTful APIs** using **Node.js** and **Express.js** to manage all business logic, while **structuring and administering** the product and user data within a **MongoDB (NoSQL)** database.

Red-Zone 2023 – 2024

Educational Platform
Role: Backend Developer
Developed and deployed a comprehensive educational platform dedicated to course catalog display, user authentication, and payment processing.
Key Backend Contributions:

- **Engineered** the core application logic and robust **RESTful APIs** using **Node.js** and **Express.js** to manage course content access, registration, and user sessions (Login/Logout).
- **Designed and structured** the **MongoDB** database to efficiently handle user profiles, course data, and payment transaction records.

- **Integrated** secure **payment functionalities** to facilitate the enrollment process for both general and specialized paid courses.
- **Ensured** data integrity and security for all user registration and financial transactions within the platform.

PROFESSIONAL EXPERIENCE

Volunteering in Creative champs

2021 – 2022

Summer Training in iti .

4 years in my collage
